

2018 SAUDI ARABIA - HALCYON INCUBATOR INTENSIVE: VENTURE PROFILES

Sakha Bandar Alsaeedi – Medvation

Medvation is an online educational platform for children to learn everything new in innovation and artificial intelligence which can inspire the next generation of inventors and innovators. The platform also sells the learning tools that teachers and students need.

Ebtehal Nayef AlMohammadi and Afrah Saleem Alluqmani – Exteer

Exteer is a matching platform for employers and workers in Saudi Arabia, focused on solving unemployment or underemployment issues. The program enables the individual user to develop his or her talents and increase opportunities for unemployed individuals to find and start their

best career. Exteer solves the problem of obtaining professional experience for those who are newly graduated or not enrolled in higher education.

Asma AbdulMohsen, Nadaa Muhammad Samman and Zainab Hawsa – BitGo

BitGO is a game that provides the chance for everyone to be the hero with their actual faces & characters in the game world. They can play with friends, family and worldwide; and the team will work to create

partnerships with successful game companies to replace the hero with their own new hero concept. Being the hero teaches physiological effectiveness, social effectiveness, and provides a new creative trial in the game world.

Nouf Khalid H and Raghad Khalid H – Wahdoon

Wahdoon is an electronic application that helps autistic children to improve their communication skills through games and educational activities.

Samar Rasheed HA, Reem Mohammad B and Seham AbdulJaleel Z – Taibah VR

Every year millions of visitors come to Madinah after performing Hajj or Umrah, with a strong desire to see and understand the story of the historical sites throughout the region. Taibah VR will provide the visitors the opportunity

to live the moment at the site location by seeing the history virtually through an immersive experience and enhance people’s understanding of the complex history in the region.

Aliya Bakkur Z, Bushra Khalef A and Sara AbdulHameed J – LabOnClick

LabOnClick is a digital platform that offers a better communication system between dentists and dental lab technicians, which enhances the quality and efficiency of dental services provided to the patients. The venture

suggests that by improving communication this way, it would bring about a generalized social change in their country where individuals waste months waiting for their appointments, reports, care and the attention they deserve from the facilities.

Heba M. Zahid – GreenPalm

GreenPalm is a solution to the lack of a recycling culture in Saudi Arabia and too much of food and recyclable material going to waste. Through this venture, people would be able to hand over their recyclable trash and gain points which could be used as currency at restaurants or grocery stores.
